

EDENFROM ENGINEERING

Design - Build - Sustain

About Us

EDENFROM ENGINEERING SARLU is a Congolese engineering company specializing in the study, design, implementation, and management of civil engineering projects. Established in accordance with the OHADA legal framework, we support public and private stakeholders across Africa through innovative, sustainable, and context appropriate technical solutions tailored to the current challenges facing the infrastructure sector. Our services notably include construction monitoring, inspection and supervision, consulting, technical expertise, and technical assistance.

Our Mission

To provide high quality engineering services through reliable technical expertise and innovative solutions for the development of safe, sustainable, and high performance infrastructure.

Our Vision

To become a leading engineering partner in Africa by delivering high quality, innovative, and sustainable services on time and with a strong commitment to environmental protection.

Our Services

- Civil Engineering and Project Delivery
- Construction Monitoring and Supervision
- Technical Consulting and Assistance
- Project Management and Coordination
- Environmental and Social Assessment
- Research, Development and Innovation
- Professional Training in Civil Engineering

EDENFROM ENGINEERING

Complete Engineering Solutions for Building Africa

- Civil and Structural Engineers • Engineering Consultants •
- Environmental and Project Management Experts •

1 Civil and Structural Engineers

We provide civil engineering studies, design, structural analysis, construction monitoring, and supervision of civil engineering works. Our services cover a wide range of projects, including buildings, bridges, roads, hydraulic structures, and industrial infrastructure. By combining modern engineering methods, advanced modeling tools, and technical expertise, we develop safe, economical, efficient, and sustainable solutions tailored to project requirements and fully compliant with applicable standards and regulations.

2 Engineering Consultants

We support public and private project owners throughout all stages of their projects, from planning to completion. Our services include feasibility studies, technical assistance, consulting, expertise, project planning, management, and construction monitoring. We also provide advanced engineering modeling and numerical simulations using specialized software to support efficient and reliable project delivery.

3 Environmental and Project Management Experts

We contribute to the sustainable development of infrastructure through Environmental and Social Impact Assessments (ESIA), the implementation of environmental management measures, project performance monitoring, and capacity building. We also provide professional training in key civil engineering software, including AutoCAD, Civil 3D, Revit, RSA, CYPE, ABAQUS, and MS Project, helping engineers and professionals strengthen their technical skills and improve project efficiency.

- Civil and Structural Engineers • Engineering Consultants •
- Environmental and Project Management Experts •

4 Infrastructure Project Planning and Management

Our services cover the planning, coordination, management, and monitoring of infrastructure projects. We support public and private stakeholders by providing innovative technical solutions that comply with applicable standards and promote sustainable development principles.

Through the use of cutting edge technologies, specialized software, and modern project management methods, we help our clients optimize project costs, timelines, quality, and performance.

Strategic Project Planning

We provide services in the following areas:

- Feasibility Studies and Technical Analyses
- Socio Economic Studies
- Strategic Plans and Action Plans
- Project Planning and Programming
- Technical Assessment and Risk Analysis
- Project Monitoring, Evaluation, and Control
- Project Owner's Assistance

Project Management and Coordination

Our services also include:

- Project Management and Supervision
- Resource and Schedule Planning
- Cost, Schedule, and Quality Monitoring
- Risk Management and Results Optimization
- Technical Assistance and Capacity Building

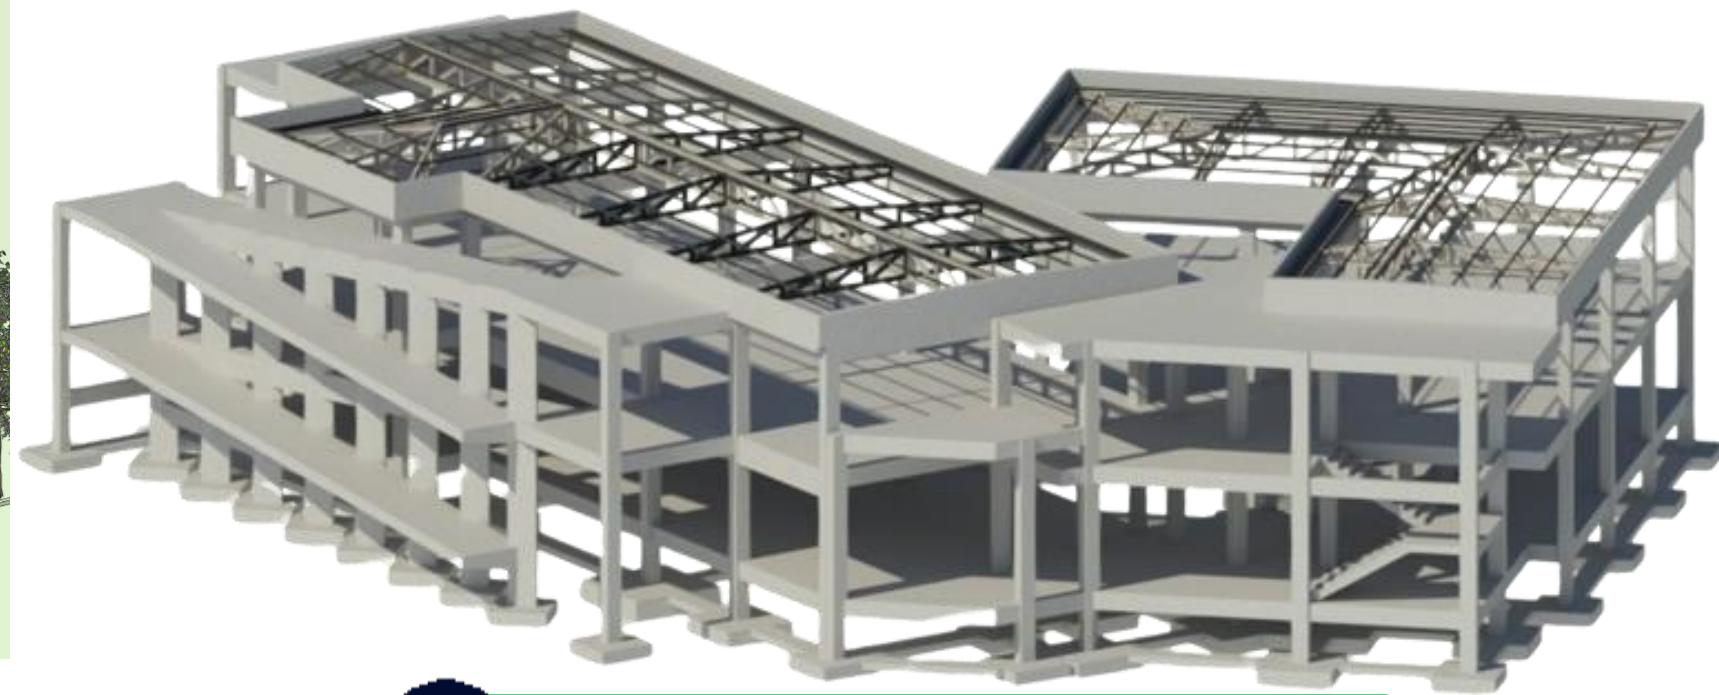

EDENFROM ENGINEERING

Design - Build - Sustain

Engineering Project Portfolio

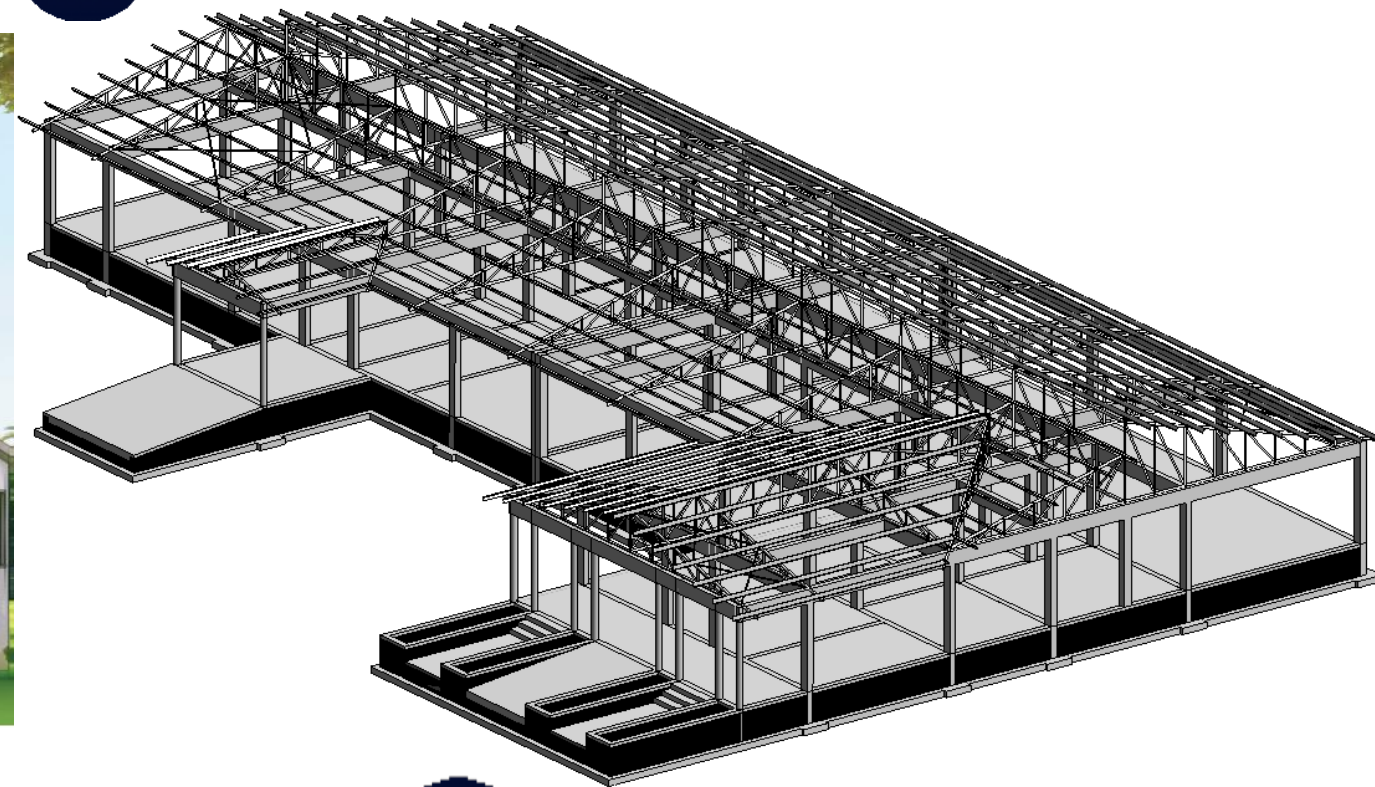

1 School of Nursing

2 Structure of Nursing School

3 Subuku Health Centre

4 Structure of Subuku H.C

EDENFROM ENGINEERING

Design - Build - Sustain

Engineering Project Portfolio

1

Villa in Togo

2

Mouanza Apartment

3

Louvakou Hostel

4

Catholic Church, Sembe

EDENFROM ENGINEERING

Design - Build - Sustain

Construction Project Portfolio

1 Perimeter Fence

2 Perimeter wall

3 Timber House

4 Foundation Level

5 Foundation Casting

6 Solar Panel Installation

Partnership and Collaboration

EDENFROM ENGINEERING maintains a professional and technical collaboration with PLENG LIMITED, an engineering company based in Nairobi, Kenya. This collaboration focuses on sharing expertise, skills, and experience in civil engineering, structural engineering, and project management.

Through this partnership, we strengthen technical capacities, mobilize complementary expertise, and create joint opportunities to develop innovative, efficient, and sustainable engineering solutions tailored to projects across Africa.

We also benefit from the support of the Tony Elumelu Foundation (TEF) through its Entrepreneurship Programme, which contributes to strengthening our entrepreneurial capabilities, supporting the growth of our business, and creating sustainable impact across Africa.

Professional Assistance and Training

We provide technical assistance and professional training for students, engineers, technicians, and civil engineering professionals. Our training focuses on practical skills, digital tools, and the development of strong technical competencies.

Professional Proficiency and Use of Digital Tools for Civil Engineering

We provide training in AutoCAD, Civil 3D, Revit, Robot Structural Analysis, CYPE, ABAQUS, MS Project, and other specialized civil engineering software.
